

SP JAT Series

CLEAR SIGNATURE PANEL

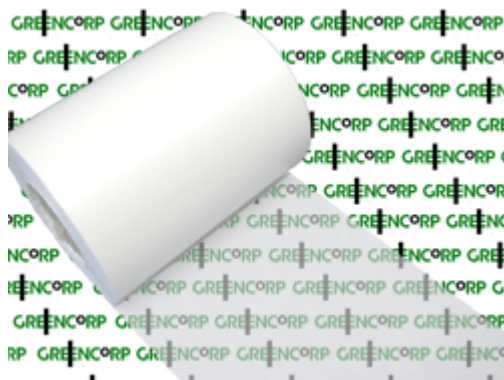

for PVC cards

SP JAT006 clear signature panel foil meets the highest standards demanded by the credit card industry. Designed to accept all types of ink signature and allowing printing on the card to be visible.

SP JAT008 clear signature panel is specially adhesive designed for continuous transfer to polyester or pvc.

Features are:

- Ease of release and sharp edge definition
- No cold flake shedding before or during application
- Solvents used to erase signature will also dissolve the signature panel
- Transparent panel allowing print on the card to be visible.
