

SS SERIES

SAFE SIG SIGNATURE PANEL *for PVC cards*

SPC White Custom Signature SPSS White Safe Sig signature panel foil meets the highest standards demanded by the credit card industry. Designed to accept all types of ink signature. The signature panel on the card will indicate that tampering of signature has occurred by either physical or chemical means by changing to a blue colour in the affected areas or printed safesig is erased. Available in 1 and 2 custom coating printed versions.

Features are:

- Ease of release and sharp edge definition
- No cold flake shedding before or during application
- Chemical or physical tampering will result in blue colour change in affected area or erasure of the printed safesig logo
- High opacity white panel allowing perfect background for signature
